

An assessment of a group therapy program from Vancouver's Prostate Cancer Supportive Care (PCSC) Program

Living with Prostate Cancer (LPC)

PURPOSE OF THIS STUDY:

This is an evaluation to determine the effectiveness of the Prostate Cancer Supportive Care (PCSC) Program's group therapy program, Living with Prostate Cancer (LPC).

WHO CAN PARTICIPATE?

Prostate cancer patients who are willing to attend the "Living with Prostate Cancer" group therapy sessions from the PCSC Program.

To be able to participate in LPC groups, men must have recently received a diagnosis of PC Stages 1 to 3, or have recently been recommended to undergo a form of treatment following a period of active surveillance.

WHAT IS INVOLVED?

Participants will be asked to complete a series of questionnaires about their experience with the LPC program at various time-points.
