Prostate Cancer
Supportive Care

Dear Physician,

Please find attached a referral form for the Prostate Cancer Supportive Care (PCSC) Program's Sexual Health Clinic at the Vancouver Prostate Centre. The PCSC Program is a comprehensive survivorship program developed at the Vancouver Prostate Centre (VPC) in 2013 for prostate cancer patients, their partners and family from the time of initial diagnosis and onwards. The PCSC Program offers both education sessions and clinical appointments on various topics such as treatment options, sexual dysfunction, urinary incontinence, exercise, nutrition, androgen deprivation therapy, and counselling.

Prostate cancer survivors and their partners often suffer significant sexual dysfunction associated with the various treatment modalities. Specifically, the PCSC Program's Sexual Health Clinics provide patients and their partners an opportunity to meet with specialty trained sexual health registered nurse and a subspecialty trained urologist to understand the sexual adaptation process, to provide sexual rehabilitation, and to learn strategies and receive medical therapies to manage the sexual side effects of prostate cancer treatments.

This program requires a simple physician referral to Dr. Ryan Flannigan with accompanying medical history. Progress letters will be sent to your office after each appointment from the sexual health nurse.

We appreciate your support in completing this referral form. The completed form can be faxed to (604) 875-4637. If you have any questions regarding our program, please contact our Program Coordinator at (604) 875-4485.

Thank you,

Ryan Flannigan, MD FRCSC
Assistant Professor, Department of Urologic Sciences, UBC
Director of Male Fertility & Sexual Medicine Research Program, UBC
Clinical Lead, Provincial Sexual Health Program, Prostate Cancer Supportive Care Program
Adjunct Assistant Professor, Department of Urology, Weill Cornell Medicine

Celestia (Tia) Higano, MD, FACP
Medical Director, Prostate Cancer Supportive Care Program
